How to use the EnergyGuide label

This sample label explains what you'll see on a label and how to use the information.

U.S. Government Federal law prohibits removal of this label before consumer purchase.

ENERGYGUIDE

Refrigerator-Freezer
 • Automatic Defrost
 • Side-Mounted Freezer
 • Through-the-Door Ice

XYZ Corporation
 Model ABC-L
 Capacity: 23 Cubic Feet

Estimated Yearly Operating Cost

\$67

\$57 ————— \$74
 Cost Range of Similar Models

630 kWh
 Estimated Yearly Electricity Use

Your cost will depend on your utility rates and use.

- Cost range based only on models of similar capacity with automatic defrost, side-mounted freezer, and through-the-door ice.
- Estimated operating cost based on a 2007 national average electricity cost of 10.65 cents per kWh.
- For more information, visit www.ftc.gov/appliances.

ENERGY STAR

Lists key features of the appliance you're looking at and the similar models that make up the cost range below.

The maker, model, and size tell you exactly what product this label describes.

What you might pay to run the appliance for a year, based on its electricity use and the national average cost of energy. The cost appears on labels for all models and brands, so you can compare energy use just like you would price or other features.

The cost range helps you compare the energy use of different models by showing you the range of operating costs for models with similar features.

An estimate of how much electricity the appliance uses in a year based on typical use. Multiply this by your local electricity rate on your utility bill to better judge what your actual operating cost might be.

If you see the ENERGY STAR logo, it means the product is better for the environment because it uses less energy than standard models.

EnergyGuide – **does not** mean the product is Energy Star rated.

If it is an Energy Star rated product you will see an Energy Star branded logo on the EnergyGuide – usually in the lower right corner.

If no Energy Star logo on the EnergyGuide and you believe it is an Energy Star rated model you can verify that information at:

www.energystar.gov.

- Choose the Find Products tab
- Choose the appliance you are researching from the list on the left side of the page
- Choose Product Finder Explore Models
- You can then either Enter the model number in the Filter Your Results box or
- You can produce an Excel Spreadsheet and work with that to search for your model number
