

# FAQ's

## Do you have a video that shows how this works?

Of course! Go to YouTube and search "Discover GREMLIN® tank monitor".

## Can the GREMLIN® be installed on any propane tank?

It works with most any propane tank that has a Rochester gauge, is within the cellular coverage area or has an open ethernet cable port in your home internet router.

## Where can I find the GREMLIN® App to see my tank readings?

The free GREMLIN® Tank Monitor App is available in both the Apple Store (iPhone and iPad), and Google Play (Android). You will need your account number with us, and the monitor serial number (located under the barcode on the sticker attached to the monitor). For a video tutorial, search "Getting started with GREMLIN® tank monitor" on YouTube.

## Introducing the **GREMLIN®** Propane Tank Monitor

- ✓ 100% accurate readings to ensure you get timely deliveries and prevent runouts
- ✓ Easily installed by our technicians
- ✓ Free Smartphone/Tablet App

**FEEL COMPLETELY CONFIDENT  
IN YOUR FUEL SUPPLY**

**GREMLIN®**  
Angus Monitoring Service

## A Tank Monitor that Gives You 100% Confidence

The GREMLIN® Tank Monitor takes the guesswork out of deliveries. It reads your fuel level through a clip that attaches to the gauge on your propane tank and sends those readings to our office via a cellular connection or your internet router. With this precision, we can ensure that you get exactly the fuel you need, when you need it. We want you to **be 100% CONFIDENT you will not run out of gas** and give you a greater connection to your comfort.

## Access to Your Tank Level and Delivery Information – All from Your Phone or Tablet

The GREMLIN® App gives you instant access to information you never had before. You'll be able to see how much fuel you have in your tank, any time, from anywhere. You'll see how much you've been using and approximately when your next delivery is scheduled. You'll be able to call or email us, or go to our website, just by tapping an icon on your smartphone or tablet.

## How is the Tank Monitor Installed?

The installation is done by our technicians in just a few minutes. Our technician attaches the tank monitor to the gauge on your tank, activates the monitor, and that's it. The sooner you have a GREMLIN® guarding your tank, the more confident you'll be.
